Name Badge

Information Guide

An eye-catching name badge will be noticed and create a professional image to your customers and clients.

Name Badges are an important part of any industry. They are a small investment that can turn a simple hello into a final sale. We want you and your staff to look your best and we have badge styles to match any need. Choose from many different materials, sizes and options. Feel free to customize the badge to fit your specifications. Name Badges speak to your customers and we take pride in matching just the right look for your industry needs.

Material/Style Options

- **Plastic** badges are vibrant, lightweight and will last a long time. Personalization can be either engraved or printed. Engraved styles are made of 2-ply plastic where your logo is printed then personalized by engraving. The top surface color is cut through by rotary or laser engraving to show the second layer of plastic. Printed styles print both the logo and personalization allowing for any look you desire. These badges are available in almost unlimited choice of colors, sizes and shapes.
- **Metal** badges will be worn with pride as they offer a look of class and professionalism. Quality finished brass or aluminum is cut to the needed size. The logo will be printed in full color and completed by adding personalization – either printed or engraved. All metal badges have rounded corners.
- **Laminated** plastic badges allow for a vivid, full color design and are protected by lamination to make them long-lasting and durable. At a thickness of a credit card they are the perfect solution for special events, seminars, trade shows, photo ID's, or a traditional name badge. Second side printing and variable barcoding are available.
- **Reusable** name badges are ideal for industries that have a seasonal workforce or a high temporary staff. Our badges are attractive, cost effective and functional and can be personalized on the spot.
